

[RING.com](https://ring.com)

When your mission is to create safer and more connected communities, challenging times require creative solutions. In our efforts to support safer neighborhoods, Ring provides public safety agencies an additional means to connect, engage and inform your residents of important developments in their community on the Neighbors App.

The Neighbors App is free and allows public safety users to:

- View and comment on publicly posted videos, photos and text-based posts related to crime and safety that have been shared by local users in your community.
- Join the conversation as an identified agency and issue alerts, notifications and announcements into hyper-local areas of the community.
- Request assistance from the community when investigating an active incident in their area.

We understand your time is valuable, certainly now more than ever. So, we created an express 30-minute web demonstration on how Neighbors can enhance your community outreach and engagement efforts to make neighborhoods safer.

To schedule a webinar (or if you are an existing user and want to learn more about our updated features), email events@ring.com to connect with a team member.
